# Is it time to ditch the word, "nonprofit?"

By Allison Gauss, Classy writer, for Stanford Social Innovation Review

Although philanthropists and social impact organizations differ in many ways – from their approaches to funding to their levels of transparency and innovation -- the sector collectively seems to agree on one thing: The word "nonprofit" isn't cutting it.

As Suzanne Perry wrote back in 2008, "Why should groups describe themselves by what they are not?" Nonprofit professionals, after all, don't focus their energy on not enriching shareholders, as the word implies.

Speaker and nonprofit executive Dan Pallotta went further, writing: "The word 'profit' comes from the Latin noun profectus for 'progress' and the verb proficere for 'to advance.' 'Nonprofit' means, etymologically, nonprogress. This is not a simple case of mistaken meaning. It's a dangerous unconscious statement of intent, or lack of it." This moniker, Pallotta argues, only perpetuates negative attitudes toward charitable organizations. He suggests "humanity sector" as a term that better reflects the shared goal. [Read more.](#)

**REWORK**

## Let's call it the humanity sector

By Dan Pallotta, social entrepreneur, Harvard Business Review

Anyone who has thought about it for more than a nanosecond agrees that "nonprofit" is about the worst possible summary we could give of ourselves and our work.

As I wrote recently, the word "profit" comes from the Latin noun profectus for "progress" and the verb proficere for "to advance." Thus, "nonprofit" means, etymologically, nonprogress. This is not a simple case of mistaken meaning. It is a dangerous unconscious statement of intent, or lack of it. The term has its roots in the Puritan conviction that the self was depraved and must be negated. Charity, as the Puritans constructed the concept, became the epicenter for this negation. No advance. No progress.

Even on the basis of the modern understanding of profit, the nonprofit sector suffers from the distinction of being the only sector whose name begins with a negative, as professor Allen Grossman noted. It apologizes for itself before it begins. It communicates only what it is against and is silent about what it is for. [Read more.](#)

## Rethinking the term "nonprofit"

By Scott London, author, Scott London blog

"Nonprofit." It's a curious word. It doesn't tell us what it is, but it tells us what it's not.

Given that the term has come to define a vast sector of American society -- one that encompasses more than 1.5 million organizations and accounts for some 10 percent of the nation's GDP -- it would seem we could come up with a better phrase, or at least one that's more descriptive.

The trouble is that many of the ideas put forward as an alternative simply miss the mark. Take, for example, the "voluntary sector." The word accurately describes the activities of many charities, yes, but these organizations represent just a fraction of the total number of nonprofits in the U.S. And besides, the word implies that all those who work in the for-profit sector somehow do so involuntarily.

Other examples include the "third sector" and the "independent sector." Hildy Gottlieb, director of the Community-Driven Institute, has made a compelling case for the term "community-benefit sector." [Read more.](#)

## Seven ways to engage teleworkers and strengthen company culture

By Todd Richardson, entrepreneur-in-residence, FirstPerson

In the blog, [The case for telecommuting workforce](#), I took a dive into the perks and pitfalls of having employees who telework. In order to get this right, it's important to understand that it comes down to the issue of culture.

If you're ready to take the plunge, or even if you already have employees who telework, here are seven tips to most effectively reap the benefits of telecommuting by engaging your remote workers and maintaining company culture:

### #1 Effective remote management boils down to effective remote communication

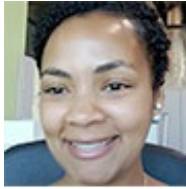

Telecommuting often erases the little moments -- the jokes, the random thoughts turned into big ideas, the easy collaboration. Spend an extra few minutes on the phone to catch up. Put extra effort into personalizing your electronic communications. I don't mean multiple exclamation points (we're not 12 anymore), but I do mean a little humor or the occasional emoticon. (Think of it as affording

you the luxury of nailing the joke you normally come up with three minutes too late in the office meeting -- finally, time to craft the ultimate pun!) [Read more.](#)
